

MONGLEKIDS

Monglekids

7-Day Creative Mission Book

AGES 4-8 · CREATIVITY & STEAM

One question a day, one imagination a day.

A 7-day adventure where thinking grows.

This book belongs to

Age _____ · Even better together with a grown-up 🧡

A world where curiosity grows

Monglekids is a creative learning world where children grow **curiosity, imagination, and confidence** – one playful question at a time.

Your guide is **Moong**, a friendly little cloud who loves to wonder. Together you'll **observe, imagine, explore, make, and tell**. This book is a 7-day taste of that journey.

♥ Our belief

We help raise children who **create questions** – not just memorize answers. **Turn screen time into thinking time.**

💡 What children build

Creative thinking · problem-solving · science curiosity · self-expression · confidence

👨👩 Made for families

Just 20–30 relaxed minutes a day. There are no wrong answers – follow your child's ideas and gently ask “Why?”

📖 Inside this book

7 daily creative missions + a Korea Special – each with a story, a science note, and lots of room to draw & dream.

Table of Contents

GETTING STARTED

About Monglekids 1

How to Use This Book · meet Moong 3

For Grown-ups 4

7 CREATIVE MISSIONS

Day 1 · No bridge? 5

Day 2 · Cloud in a bag? 7

Day 3 · Animal talk 9

Day 4 · Living shadow 11

Day 5 · Catch the wind 13

Day 6 · Slow time 15

Day 7 · Starry Night 17

FINISH & BEYOND

Certificate of Creativity 20

Day 8 · Korea Special 21

About the Monglekids App 24

Hi! I'm Moong. Let's adventure together!

Read one little story each day and let your thoughts unfold. **Observe, imagine, explore, make** and **tell** – and grow your very own creativity!

HINT

If you get stuck, look at the green “Hint”.

SCIENCE NOTE

The purple box reveals the hidden principle.

TIP

A hands-on challenge – try it yourself!

The 5 steps, every day

- 1 **Observe** – Find what is happening.
- 2 **Imagine** – Another way? The sillier the better!
- 3 **Explore** – Why is it so? Find the hidden principle.
- 4 **Make** – Draw it, write it, build it!
- 5 **Tell** – Say why you thought that way.

How to get 200% out of this book

Goal

Build the habit of asking & thinking – focus on the *process*, not the “right” answer. Just 20–30 relaxed minutes a day.

Try saying

“What do *you* think?” · “Tell me more.” · “What a fun idea!” · “Why did you choose that?”

Try to avoid

“That’s wrong.” · “Do it like this.” · “Hurry up.” · giving the answer too quickly.

Key message

Ask back: “How do *you* think?” A child finding their own way is the biggest learning of all.

What each day grows

Day 1 · No bridge? – Problem-solving + Buoyancy

Day 2 · Cloud in a bag? – Senses + State change

Day 3 · Animal talk – Empathy + Communication

Day 4 · Living shadow – Imagination + Light

Day 5 · Catch the wind – Invention + Aerodynamics

Day 6 · Slow time – Perspective + Speed

Day 7 · Starry Night – Art + Emotion

Day 8 · Korea Special – The Dancing Mask

What if there's no bridge?

Moong wanted to visit a friend, but the bridge over the river had collapsed. Moong stared at the water. **"Is there another way?"**

Did you know?

Ants grab onto each other to build an "ant bridge" and cross the water!

Science Note · Buoyancy

Things float when lighter than water – wood floats, stone sinks. An arch bridge holds heavy weight thanks to its arch shape!

Problem-solving

Buoyancy

Structure

Thinking Lab

1 Observe – Sort what floats vs sinks.

Floats ☁

Sinks 🪨

2 Imagine – Ways to cross the river (rank them).

1

2

3

TIP · Try at home

Fill a basin with water and drop in objects. What do the floaters have in common?

Tell

Tell a grown-up which way is best, and why.

Moong says: There's no wrong answer – the sillier, the better! 🌈

DAY 1 · Invent a way to cross the river!

STEP 1. Circle the materials you'll use (pick a few!)

Log

Rope

Balloon

Stone

Big leaf

Wheel

Your own!

STEP 2. Combine them and design your machine!

Machine name

Materials used

How it works!

Draw your invention BIG here 

What if you put a cloud in a bag?

Moong looked up at the fluffy clouds. **"What if I could touch that cloud? Could I keep one in a bag?"**

Did you know?

One cloud can weigh as much as 100 elephants! Its water drops are so tiny it floats.

Science Note · Condensation

Water has 3 forms: freeze → ice, boil → vapor. A cloud is vapor turning back into water droplets – that's condensation.

Five senses

Condensation

State change

Thinking Lab

1 Observe – Imagine the cloud with your senses (1-5).

Fluffy ☐☐☐☐☐ Cold ☐☐☐☐☐ Heavy ☐☐☐☐☐

2 Imagine – Features for a cloud-keeping bag?

TIP

(cloud-sucking straw · a cooler · an amount window · your own idea)

Tell

Why does your bag need each feature?

Moong says: Dream big – your bag can do anything! ☁

DAY 2 · Design your cloud-keeping bag!

Bag name _____ · Price _____ · Slogan _____

Design the 3 sides – add buttons, pockets, gauges and name them.

Front

Back

Side

Talking with a silent animal

Tori met a little rabbit in the forest. It said nothing, but kept looking and sniffing. **"What is it trying to say?"**

Did you know?

Bees talk with dances, dolphins with sounds, and dogs with their tails!

Science Note · Pheromones

Ants leave an invisible chemical trail to show the way. A dog sniffing is reading information by smell!

Non-verbal

Pheromones

Empathy

Thinking Lab

1 Observe – What might a rabbit mean when it...

sniffs its nose? _____

thumps its feet? _____

perks its ears? _____

2 Imagine – What does the rabbit want to tell you?

Tell

Try "speaking" to a grown-up without words!

Moong says: Every animal has feelings, just like you. 🧡

DAY 3 · Make animal talk-cards!

Draw an animal, circle its feeling (😊 😢 😐), and write what it wants to say.

Card 1 – 😊 😢 😐

What it wants to say:

Card 2 – 😊 😢 😐

What it wants to say:

Card 3 – 😊 😢 😐

What it wants to say:

Card 4 – 😊 😢 😐

What it wants to say:

What if your shadow came alive?

One evening, Lumi's shadow began to move on its own – and waved!

“What does the shadow want to do?”

Did you know?

When the sun is high, shadows are short; when low, long. Long ago people told time with sundials!

Science Note · Light travels straight

Light hits an object and a dark shadow forms behind it. A flashlight close = big shadow, far = small. You can make animal shapes too!

Light

Character creation

Self-understanding

Thinking Lab

1 Observe – How are you & your shadow same / different?

Me

My shadow

2 Imagine – Your shadow's profile

Name _____ · Personality _____

TIP

Move a flashlight near & far – watch your shadow grow and shrink!

Moong says: Your shadow is one of a kind – just like YOU! ✨

DAY 4 · Create your shadow friend!

Shadow Profile

Name · Personality · Likes · Special power · A message for me

Draw your shadow character BIG 

Can you catch the wind?

A strong wind blew Lumi's hat away. She reached out, but the wind slipped through her fingers. **"Can you catch something invisible?"**

Did you know?

Pinwheels, wind turbines and sailboats all "catch and use" the wind!

Science Note · Aerodynamics

Wind = moving air! Warm air rises, cool air rushes in – that's wind. Strong wind can even make electricity!

Aerodynamics

Wind power

Design

Thinking Lab

1 Observe – Circle the evidence of wind

leaves shaking · hair flying · flag fluttering · balloon drifting

2 Imagine – A wind-collecting machine

Gathers by _____

Stores by _____ · Releases by _____

Tell

Where would you use your wind machine?

Moong says: Inventors try, try, and try again! 🐾

DAY 5 · Wind-machine blueprint!

STEP 1. Circle the parts

Propeller

Tank

Antenna

Gear

Magnet

Bulb

Your own!

STEP 2. Draw the machine & show the wind's path with arrows 🌀 → → → ⚡

Draw your wind machine here

Machine name

Slogan

What if time slowed down?

One morning, everything moved very slowly. Only Lumi moved at normal speed. **"If time slowed, what would you do?"**

Did you know?

A high-speed camera shows a water drop splash up into a crown – you can even see a hummingbird's wings!

Science Note · Speed = distance ÷ time

A cheetah runs 30 m in 1 second; a snail moves 1 m in a minute. Same time – totally different distance!

Speed

Observation

Perspective

Thinking Lab

1 Observe – A slow world: good & tricky points

Good 👍

Tricky 😬

2 Imagine – Top 3 things you'd do

1

2

3

TIP · Slow motion!

Walk very slowly for 10 seconds. Notice the floor, sounds, air you usually miss!

Moong says: Slow down and notice the little things. 🐌

DAY 6 · A 4-panel comic of the slow world!

In a slow world I want to _____ because usually _____.

1 · At first...

2 · But then...

3 · So...

4 · In the end!

Starry Night, through Van Gogh's eyes

"The Starry Night" – Vincent van Gogh (public domain)

Moong looked up at the twinkling night sky. **"Why does the sky in his painting swirl?"**

Did you know?

Van Gogh was a Dutch painter. He painted not what he saw, but what he felt in his heart!

Art Note · Impasto

He used very thick paint! Up close it's bumpy; from far the sky seems to really move.

Thinking Lab

1 Observe – Find these in the painting

swirling sky · big bright stars · crescent moon · pointy cypress tree · quiet village

2 About Van Gogh (1853-1890)

He sold only **one** painting in his life – now he's one of the world's most-loved painters!

More paintings

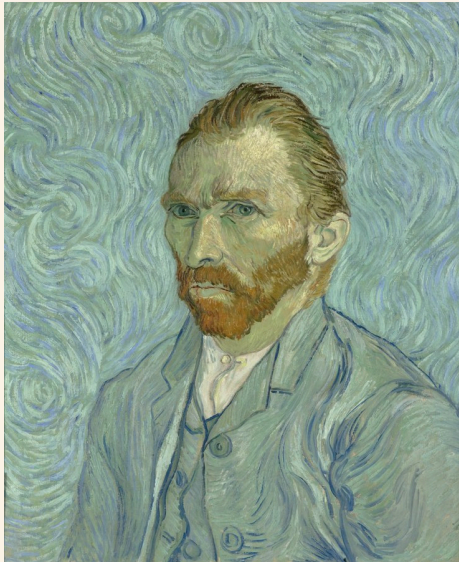

Turn the page to see more of Van Gogh's famous works →

Moong says: Art is how we share our feelings. 🎨

More paintings by Vincent van Gogh

Self-Portrait, 1889

● About Van Gogh (1853–1890)

He started painting at 27 and sold only **one** painting in his life – yet today he is one of the world's most-loved painters. He painted what he *felt*!

● Think about it!

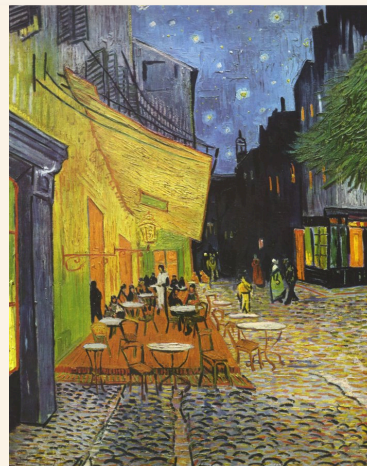

Why are his paintings so bumpy? How do Sunflowers and Starry Night feel different?

Sunflowers

Starry Night Over the Rhône

Café Terrace at Night

Irises

All works by Vincent van Gogh · public domain

DAY 7 · Paint your own swirly Starry Night!

“Dear Mr. Van Gogh, when I look at Starry Night I feel _____ because _____.”

Fill the page with swirls and shining stars – your very own starry night.

Title

This painting's feeling

Draw your swirly starry night 

7 missions complete! 🎉

Every day you asked, imagined, and made something. All of these thoughts are your very own treasure.

★ **Color a star for every mission you finished!**

CREATIVE EXPLORER CERTIFICATE

Certificate of Creativity

_____ wonderfully completed the 7-Day Creative Mission
with Moong!

Date _____

The Dancing Mask (Talchum 탈춤)

Moong found an old wooden mask in a Korean village. When the drums played – *dung, dung!* – the mask began to smile... and dance! **"Every Korean mask has its own face and feeling. What would YOUR mask feel?"**

Did you know? · Korea

- Korean masks are called **Tal (탈)**; the Hahoe masks are 800+ years old.
- **Talchum (탈춤)**, the Korean mask dance, is on the **UNESCO** list!
- **Hangeul (한글)** is the Korean alphabet · **Hanbok (한복)** is the colorful traditional dress.

Culture Note · Feelings in motion

Each mask shows one big feeling – a wide laugh, a sly grin, a kind smile. The dance turns **feelings into movement** – just like Monglekids creatures coming to life!

Korean culture

Emotion → movement

Pattern & color

Thinking Lab

- 1 **Observe – Masks can look happy, sly, surprised, kind. What feeling will yours show?**

- 2 **Imagine – Your mask**

Name _____ · Feeling _____

The story it dances:

Bonus · Hangeul

Write your name in Korean letters (ask a helper)! My name in Hangeul: _____

Korean masks & the mask dance

Hahoe mask · 하회 양반탈
the laughing nobleman (Yangban)

Gaksi mask · 각시탈
the gentle bride

Talchum · 탈춤
feelings become movement

● Look closely!

Each mask shows one big feeling – the Yangban grins, the Bride looks calm. Korean **Talchum** (mask dance) is a **UNESCO** Intangible Cultural Heritage. Which feeling will YOUR mask show?

Hahoe masks: photos © Bernard Gagnon (CC0); mask dance © neochicle (CC BY 2.0) – via Wikimedia Commons

Make your mask come ALIVE! 🎭

1 • Draw & color your own Korean mask – big eyes, a mouth, and bright patterns!

Draw & color your Tal mask here 🎨

Mask name

Its feeling

Watch it DANCE! 🎭➡️✨

1. **Scan** the code with a grown-up's phone
2. **Snap** a photo of the mask you drew
3. **Watch** Moong bring it to life & make it dance in the Monglekids **Mask Dance**!

monglekids.com · Mask Dance

Your photo is never uploaded or saved 💛

From 7 days → 365 days, with the Monglekids app

This book was just a taste. In the **Monglekids app**, AI Moong keeps the imagination going.

♥ Our belief

Not a child who memorizes answers – a child who creates questions. Monglekids never gives the answer; it asks “Why?” and “What’s another way?” – and that’s where real thinking grows. **“Turn screen time into thinking time.”**

Early supporter: be first to try AI Moong, tailored missions & growth reports at launch. ♥

How the app continues the book

- 1 Snap the page – AI Moong reads it and asks “Why did you think that?”
- 2 One thought leads to another – new questions follow every answer.
- 3 A new mission every week – tailored to your child.
- 4 See the growth – a weekly creativity report.
